Kitting Services

Standard Electric's Kitting and Customer Assembly team will work with you to better understand your requirements, budget and timeline. We will eliminate the worry of any hidden charges or surprises. We will assemble your finished kits, make sure the required pieces are uniformly packed in each kit, meet your deadline and stay on budget.

Benefits of Kitting with Standard Electric:

- **Free up your Valuable Resources:** Trust Standard Electric with your kitting processes and start enjoying the cost savings that stems from not having to invest in this time-consuming activity.
- **Quick and Efficient Assembly:** With 15 stocking locations, Standard Electric is able to provide you with quick, cost effective delivery. As a result your kits and assemblies are local to you and you don't have to wait for parts to arrive. We process incoming parts in bulk, rather than individually as each order arrives. This keeps the time we process inventory low and streamlines the whole kitting process
- **Create a Positive Financial Impact:** By reducing or eliminating the number of SKU's, you reduce your transactional costs significantly. This allows you to direct additional resources to growing your business and meeting your customer's needs.
- **More Efficient Packaging:** Our kitting services provide more efficient and economical packaging. For instance, we can reduce the size, weight and shipping costs of kits by using custom-sized boxes instead of standard sizes. Smaller sized boxes result in less consumption of packaging, driving further efficiencies and helping our customers meet their sustainability goals.
