BENEFITS OF VERSATILE CABLING IN MATERIAL HANDLING

This webinar will focus on the growing variety of ways that cables are used in material handling, including applications with complex motion profiles, long cable runs, and intricate routing requirements. We'll explore the benefits of specifying cables that are able to perform in a variety of these applications, as well as the cable requirements needed to ensure a long and reliable service life, such as:

- Standards and listings
- Mechanical performance
- Electrical characteristics

Attendees will leave with an understanding of what to look for when specifying cables for their applications. If you're in engineering, design, or purchasing, this class is ideal for you.

WEBINAR

Wednesday, February 24

11:00 AM - 12:00 PM CST
