

# VM Series

## configuration options and specifications

### \*\* Suffix

**No Suffix:** Opaque cover with four non-metallic corner screws

**CT:** Transparent cover with four non-metallic corner screws

**K:** Opaque cover with four non-metallic corner screws and knockouts in the base

**CTK:** Transparent cover with four non-metallic corner screws and knockouts in the base

**PBS:** 30.5 mm NEMA sized push-button holes and four non-metallic corner screws

**PBM:** 22.5 mm IEC sized push-button holes and four non-metallic corner screws

CT, K and CTK not available in 433, 733 and 933 enclosures

### Features

- Enclosures are maintenance free and corrosion resistant.
- Bases and opaque covers are made from Valox® 357U that can withstand continuous temperatures up to 280°F (138°C).
- Transparent covers are made from polycarbonate that can withstand continuous temperatures from -13°F to +104°F (-25°C to +40°C).
- Knockouts in the base facilitate conduit entry
- Cover screw holes in corners are outside of the gasketed area.
- Continuous gaskets made of polyurethane foam guarantee optimal integrity.
- All enclosures can be easily modified to customer specifications.

### Applications

The VM Series enclosure is designed for use as insulated electrical junction boxes, terminal wiring boxes, instrument housings, electrical control boxes and push-button housings in wet, dusty and corrosive environments.

### Standards

#### Configurations

**CT:** Four non-metallic corner screws

#### Features

- Enclosures are maintenance free and corrosion resistant.
- Bases are made from Valox® 357U that can withstand continuous temperatures up to 280°F (138°C).
- Transparent covers are made from polycarbonate that can withstand continuous temperatures from -13°F to +104°F (-25°C to +40°C).
- Cover screw holes in corners are outside of the gasketed area.
- Continuous gaskets made of polyurethane foam guarantee optimal integrity.
- All enclosures can be easily modified to customer specifications.

#### Applications

The VM Series enclosure with transparent cover is designed for use as insulated electrical junction boxes, terminal wiring boxes, instrument housings, electrical control boxes and push-button housings in wet, dusty and corrosive environments when visibility of internal components is essential.
