Further products for power supplies can be found in Catalog KT 10.1 or
on the Internet at <http://www.siemens.com/sirius-supplying> and <http://www.siemens.com/sitop>.

Introduction

Options***Delivery time classes DT***

The delivery time classes are specified in the selection tables in front of the order numbers.

The standard transport time for Germany is 1 day (see "Explanations" page 4).

The delivery time class for 6EP1 power supplies does not depend on the quantity.

The quoted delivery time class for the 4AV power supplies is applicable to an order quantity of up to 5 units.

► Preferred type

This delivery time class applies with the degree of protection IP00, i. e. these units can be supplied immediately from stock¹⁾ and will be dispatched within 24 hours. The transport times depend on the destination and the mode of delivery.

Delivery time class B is applicable to an order quantity of 6 units and more.

Delivery time class A

The ordered units will be dispatched within 2 working days.

Delivery time class B is applicable to an order quantity of 6 units and more.

Delivery time class B

The ordered units will be dispatched within 1 week.

Delivery time class C is applicable to an order quantity of 6 units and more.

Delivery time class C

The ordered units will be dispatched within 3 weeks.

Delivery time class D is applicable to an order quantity of 6 units and more.

Delivery time class D

The ordered units, including enclosure and additional options, will be dispatched within 6 weeks.

Orders of power supplies with selectable input and output voltages

Please send your selection by e-mail with the basic Order No. and the required options specified in plain text to:

MD_Anfrage.aud@siemens.com

or by fax to: +49 (0)421/5125 333.

In response you will receive the complete Order No. for completing your order.

Ordering power supplies in customized versions or with special applications

Inquiries for customized power supplies not found in our catalog should be sent to:

MD_Anfrage.aud@siemens.com

or by fax to: +49 (0)421/5125 333.

In reply you will receive the complete Order No. which should be quoted in your order.

More information

More information about power supplies, transformers, fans, reactors and filters can be found on the Internet at

<http://www.siemens.com/sirius-supplying>

¹⁾ This is based on commercially available orders – normal order!

For products and information on

- Reactors and filters, see Catalog LV 60,
Order No.: E86060-K2803-A101-A4-7600

- For 2CC and 2CQ axial fans, see Catalog LV 65,
Order No.: E86060-K1865-A101-A1-7600

Transformers for converter systems from Siemens can be found in the following catalogs:

Catalog NC 60, SINUMERIK & SIMODRIVE
Order No.: E86060-K4460-A101-B2-7600

Catalog DA 65.10, SIMOVERT MASTERDRIVES Vector Control
Order No.: E86060-K5165-A101-A3-7600

Catalog DA 65.11, SIMOVERT MASTERDRIVES Motion Control
Order No.: E86060-K5165-A111-A3-7600

4AV Non-Stabilized Power Supplies

Filtered for Supply of Electronic Controls

General data

Overview

4AV2, 4AV3, 4AV4 and 4AV5 power supplies deliver a non-stabilized DC voltage of 24 V DC based on single-phase or three-phase safety isolating transformers with downstream rectifiers and capacitor filtering.

Note

Screw terminals

Cage Clamp terminals

Flat connectors

The terminals are indicated in the selection and ordering data by orange backgrounds.

Application

The 4AV2, 4AV3, 4AV4 and 4AV5 units are used for:

- Supplying general electrical loads
- Supplying control circuits
- Power supply to electronic controllers They comply with the requirements of EN 61131-2 "Programmable controllers – equipment specifications and tests" and are suitable for SIMATIC or other systems.

Rated power and rated current

The specifications in the selection tables are based on fixed reference conditions in which the devices have the rated power or rated current:

- Uninterrupted duty P_n
- Frequency AC 50 ... 60 Hz
- Installation height up to 1000 m above sea level
- Degree of protection IP00
- Ambient temperature t_a

Ambient conditions

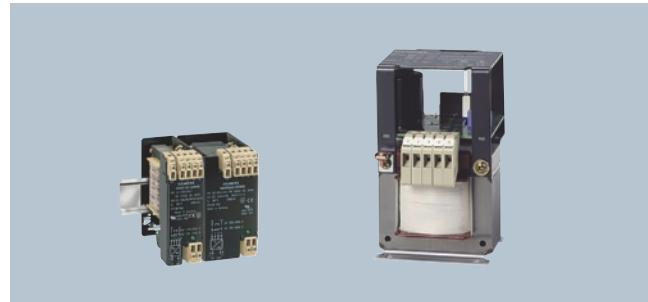

The units are designed for mounting in enclosed controllers and electronics cabinets. They are climate-proof for installation in rooms with an external climate according to DIN 50010.

Limit values:

- Ambient temperature with rated power and rated current for types:
 - 4AV2 and 4AV3: Up to +60 °C
 - 4AV4 and 4AV5: Up to +40 °C
 - Minimum value for all types: -25 °C.
- Relative air humidity:
 - At +40 °C occasionally up to 100 %
 - Annual average up to 80 %
 - Occasional condensation possible.

Overview

- Rated output voltage U_{2N} 24 V DC according to EN 61131-2¹⁾ and SIMATIC at input voltage +6 % to -10 % and load 0 % to 100 %
- Safety transformer according to EN 61558-2-6
- 4AV21, 4AV23: cPlaus at 60 °C, :
4AV20, 4AV22, 4AV24, 4AV26: cPlaus at 60 °C, ;
4AV41:
- 4AV2: $t_a = \text{max. } 60 \text{ °C/B}$,
4AV41: $t_a = 40 \text{ °C/B}$
- Varistor suppressor circuit
- Status LED
- EMC according to EN 62041:
 - 4AV2: Suitable for connection to the public supply (residential environments) and industrial networks (industrial environments);
 - 4AV4: Suitable for connection to industrial networks (industrial environments)
- Ripple < 5 %.

4AV21, 4AV23 (left) and 4AV20, 4AV22 to 4AV24 (right)

4AV Non-Stabilized Power Supplies

Unfiltered for Supply of General Loads

**4AV98 power supplies,
unfiltered, single-phase**

Overview

The 4AV98 power supplies comprise single-phase safety transformers according to EN 61558-2-6 with downstream bridge connection rectifiers without capacitor filtering.

- Rated output voltage U_d 24 V DC
- Safety transformer according to EN 61558-2-6
-
- $t_a = 50$ °C/B
- Varistor suppressor circuit
- Short-circuit and overload protection on the output side with top-mounted fuse
- Ripple 48 %.

4AV98

Application

The single-phase 4AV98 devices are especially suitable for supplying resistive and inductive loads whose operational voltages place no special demands with regard to ripple.

Rated power and rated current

The specifications in the selection tables are based on fixed reference conditions in which the devices have the rated power or rated current:

- Uninterrupted duty P_n
- Frequency AC 50 ... 60 Hz
- Installation height up to 1000 m above sea level
- Degree of protection IP00
- Ambient temperature t_a .

Ambient conditions

The devices are climate-proof for installation in rooms with an external climate to DIN 50010.

Limit values:

- Ambient temperature
 - At rated power or rated current: +50 °C
 - Minimum value: -25 °C.
- Relative air humidity
 - At +40 °C occasionally up to 100 %
 - Annual average up to 80 %
 - Occasional condensation possible.

4AV Non-Stabilized Power Supplies

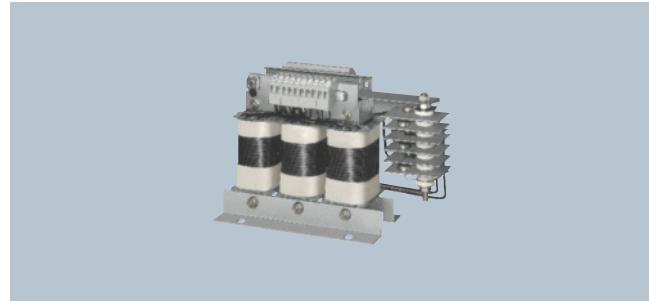

Unfiltered for Supply of General Loads

**4AV96 power supplies,
unfiltered, three-phase**

Overview

The 4AV96 power supplies comprise three-phase safety transformers according to EN 61558-2-6 with downstream bridge connection rectifiers without capacitor filtering.

- Rated output voltage U_d 30-27-24 V DC
- Safety transformer according to EN 61558-2-6
-
- Shield winding between input and output winding
- Varistor suppressor circuit
- Designed and approved according to VW equipment specification
- Ripple < 5 %.

4AV96

Application

VW approval

The 4AV96 three-phase units are designed and approved in accordance with the VW equipment specifications.

Rated power and rated current

The specifications in the selection tables are based on fixed reference conditions in which the devices have the rated power or rated current:

- Uninterrupted duty P_n
- Frequency AC 50 ... 60 Hz
- Installation height up to 1000 m above sea level
- Degree of protection IP00
- Ambient temperature t_a .

Ambient conditions

The devices are climate-proof for installation in rooms with an external climate to DIN 50010.

Overview

With LOGO!Power power supplies it is possible not only for 24 V loads to benefit from the advantages of a stabilized power supply - loads with a 5 V, 12 V and 15 V supply voltage can now do likewise. For each of these three voltages there are two levels of current available, and for 24 V there is even a 4 A version in a width of only 90 mm.

The primary switched power supplies can be used for a wide range of different applications: In automation systems for industry and buildings, solar technology, measurement and control, sensors, for supplying electronic circuits in TTL technology, etc.

Advantages of LOGO!Power power supplies:

- 2 performance classes, each with 5 V, 12 V and 15 V; 3 performances classes with 24 V
- Compact design with a width of 54 mm, 72 mm or 90 mm
- Flat step profile, ideal also for mounting in small distribution boards
- Design adapted to LOGO! microcontrollers

- Constant current in case of overloading, for reliable connection of difficult loads such as DC/DC converters and motors
- Large setting range for the output voltage, using potentiometers which are easy to reach from the front
- Green LED indicator for "output voltage OK"
- For universal use – in industry and public low-voltage systems – worldwide
- Wide range input from 85 V to 264 V AC for virtually any network in the world
- Large temperature range from –20 °C to +55 °C for universal use
- High EMC standards
- Extensive approvals and certifications according to CE, UL/cUL, FM and shipbuilding (GL and ABS)
- Constant stabilized output voltage protects connected loads
- Parallel switching option permitted to increase performance

6EP Stabilized Power Supplies

SITOP 6EP Power Supplies

SITOP smart, single-phase and three-phase

Overview

Small in size, big in performance. The new SITOP smart series of power supplies needs a third less room over the width of a standard mounting rail than its predecessor, while its overload behavior has been improved to short-time max. 150 % of the output current. Numerous certifications make the power supplies suitable for universal use worldwide.

- Choice of power levels from 60 W to 240 W for universal use
- Compact design with a width of only 32.5 mm, 50 mm and 70 mm for a small mounting surface
- Easy standard rail mounting
- Smooth switching on of loads with high inrush current such as DC/DC converters and motors

- More performance thanks to permanent 120 % of rated power up to an ambient temperature of 45 °C
- Large setting range for output voltage up to 28 V, using potentiometers which are easy to reach from the front
- Parallel switching option to increase performance
- Extensive certifications according to UL, CSA, GL (Germanischer Lloyd) and ATEX directives (Atmosphère Explosible)
- For universal use – in industry and public low-voltage systems – worldwide
- Can be combined with SITOP add-on modules: redundancy module, SITOP select diagnostics module, DC UPS and battery modules

6EP Stabilized Power Supplies

SITOP 6EP Power Supplies

SITOP modular basic units 24 V,
single-phase, two-phase and three-phase

Overview

Compact basic units for single-phase, two-phase or three-phase connections and output currents from 5 A to 40 A form the basis of the stabilized 24 V supply. Depending on the requirements, SITOP add-on modules can be connected in addition.

The compact design of the primary switched power supply requires only a small mounting surface. The rugged metal enclosure is also suitable for the harshest industrial applications. The standard mounting rail fixture is made likewise of metal. Mounting is therefore fast, easy and vibration-proof. Reliability and quality are further characteristics of the electronic design.

The large input voltage range and the international certifications enable operation in virtually any network worldwide. The single-phase basic units 5 A and 10 A have an ultra-wide input range up to 550 V, which even enables connection to 2 phases.

- Standard rail mounting
- 5 A and 10 A units with single-phase and two-phase connection (L1 and N, L1 and L2)
- Degree of noise suppression Class B
- Limitation of input current harmonics according to EN 61000-3-2; (except 6EP1 337-3BA00)
- Adjustable output voltage up to 28.8 V
- 3-way status LED
- Selectable short-circuit response, constant current or latching disconnection
- Changeover for parallel operation
- 20 A and 40 A units with single-phase and three-phase connection and new 20 A device in compact design (70 mm wide)
- Can be combined with SITOP add-on modules: signaling module, redundancy module, SITOP select diagnostics module, buffer module, DC UPS and battery modules

6EP Stabilized Power Supplies

SITOP 6EP Power Supplies

Add-on modules

Overview

The SITOP add-on modules offer further functions:

The signaling module can be snapped onto the side of the basic unit; with floating signaling contacts "Output voltage OK" and "Ready"; with signal input for remote ON/OFF switching of the basic unit.

The redundancy module uses diodes to disconnect the basic units from one another so that a redundant 24 V power supply can be constructed.

The SITOP select diagnostics module is used in combination with 24 V power supplies for distributing the load current among up to 4 current branches per module and for monitoring the in-

dividual partial currents. Overloads or short-circuits in individual branches are selectively switched off and the remaining load current paths remain unaffected. Rated current is adjustable from 2 A to 10 A, LED, group alarm contact, standard rail mounting.

The buffer module bridges mains interruptions in the range of milliseconds. 100 ms at 40 A, 800 ms at 5 A, up to max. 3 s at low load current; standard rail mounting in any part of the control cabinet.

Power supplies and add-on modules with

- ambient temperature 0 °C to +60 °C.

Uninterruptible power supplies 24 V

Overview

Mains failures of a longer duration can be buffered without any interruption at all by combining a DC UPS module with at least one battery module and a SITOP power supply.

Protection and monitoring functions ensure a high level of availability, and the integrated battery management guarantees a long endurance of the maintenance-free battery modules.

DC UPS modules with

- Interfaces for communication in PC-automated installations
- Ambient temperature 0 °C to +60 °C (natural convection)

Battery modules

- 2.5 Ah: ambient temperature -40 °C to +60 °C
- 3.2 Ah to 12 Ah: ambient temperature +5 °C to +40 °C

Selection and ordering data

	Version	Input Rated voltage U_e Rated	Output Rated voltage U_a Rated	Rated current I_a Rated	Dimensions (W x H x D) mm	DT	Order No.	Price per PU	PU (UNIT, SET, M)	PS*	PG	Weight per PU approx. kg	
DC UPS modules
