

TeSys island Motor control plus visibility anywhere, anytime

As System Integrators look for new ways to differentiate their business and complete projects faster, they are turning to Schneider Electric to get there.

With TeSys™ island smart motor control the digital interface and simple ribbon cable allow you to install motor control solutions in less time with less wiring. Quickly make changes at any stage and easily integrate with any PLC through the digital tools.

Include TeSys island in your customer's motor control solution, and be among the first to enable smart motor control with access to data anywhere, anytime. Give your customers peace of mind and a simple way to remotely monitor and manage motors.

Configure and Install Faster

- Integrates easily with Rockwell Studio 5000 and Siemens TIA Portal

Digital tools

Simplify configuration and connectivity

Digital selector tool enables simple design and integrates easily with any PLC

Adjust with ease

Quickly make changes at any stage of the project by easily adjusting Full Load Amps and settings through the digital tools.

Program faster

Access library of predefined function blocks in place of repetitive starter code to reduce programming time.

Cloud-based, remote monitoring and management

Access to voltage, motor current, energy consumption, power factor and motor/ device status (ON / OFF), and more.

Why you'll like TeSys island...

No control wiring

Digital solution is easy to troubleshoot and adjust during commissioning.

Key performance data included - it's already baked in.

Why customers will like TeSys island...

Less wiring, less breakage points and quick device replacement.

Enable less skilled technicians to identify and resolve issues before they happen with preventative alarms.

Remote power and energy monitoring and management with access to data anywhere, anytime.

Why add TeSys island smart motor control?

Faster

- Replace complex control wiring with a single click ribbon cable
- Quickly make changes to an installation at any stage by easily adjusting FLA and settings through the digital tools

Connected

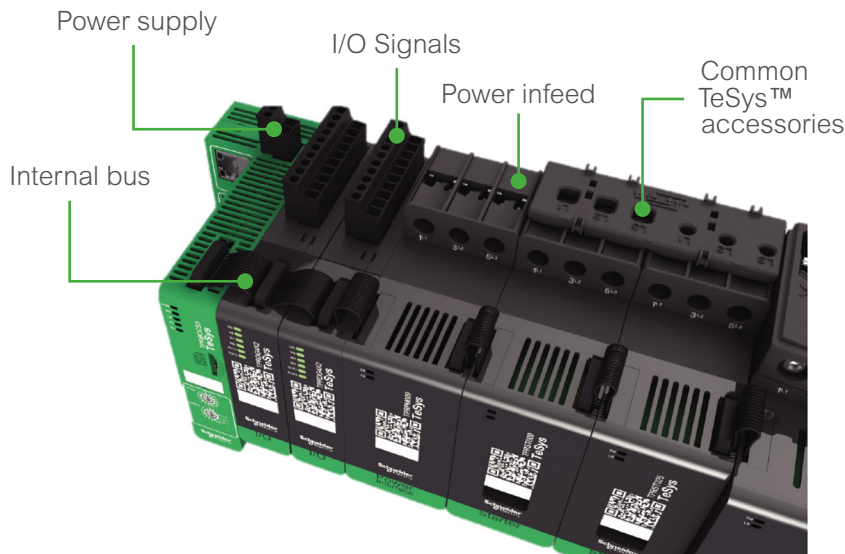

- Digital tools provide FORCE and TEST mode to verify operations are working as intended.
- View voltage, current and other critical performance data to remotely monitor and manage motors and other devices anywhere, anytime

Simple

- Integrates easily with Rockwell Studio 5000 and Siemens TIA Portal
- Smart configuration tool enables simplified programming

Easy to attach ribbon cable

- 22 part numbers
- "Click" control wiring
- Preconfigured settings
- Status lights
- Access documentation fast
